Bounded variation functions and the convergence of Cesáro means of negative order of Vilenkin-Fourier series

Gvantsa Shevardenidze

In 1971 Onneweer and Waterman establish sufficient condition, which guarantees uniform convergence of Vilenkin-Fourier series of continuous function. In the paper is proved sufficient condition, which guarantees uniform convergence of Cesáro means of negative order of Vilenkin-Fourier series of continuous function. In this work we investigated different classes of functions of generalized bounded oscillation and in the terms of these classes there is established sufficient condition for uniform convergence of Cesáro means of negative order.
