POLYNOMIAL BEHAVIOR OF THE HONDA FORMAL GROUP LAW

Malkhaz Bakuradze

Iv. Javakhishvili Tbilisi State University, Tbilsi, Georgia

We prove that the formal group law $F(x,y)$ in mod p Morava theory $K(s)^*, s > 1$, is an element in $K(s)^\wedge * [x][[y]]$ and give a method of computation using Ravenel's formaula [1].
