

## **CURRENCY EXCHANGE RATE VOLATILITY MODELING**

Givi Lemonjava

University of Georgia, Tbilisi, Georgia, Givi\_Lemonjava@yahoo.com

The report reviews currency exchange rate forecast issues. For this reason, corresponding time series have been studied based on which features of this type of series have been determined. Taking into account nature of these features, several models have been processed for currency exchange rate forecasting. Comparing the results of the models, the best model is selected and used for estimate currency exchange rate's future movements.
